

Please keep the wisconsin No-Call list in place. For those of us on a fixed income, it means that we are protected from constant harrassment from telemarketers that creat a constant nusiance. whenever a call comes through I have installed a 'catch-a-call' devise so that I can be on my computer and am interrupted to take calls. This is a convenience for my personal use. Having calls from telemarketers allowed to come through will create a financial handicap as I will have to go to cable computer, or be constantly kicked off line. I should be able to conduct my personal life interests without harrasment from telemarketers. The wisconsin No-Call list provides me with that protection. Without the "catch-a-call" I cannot receive my personal phone calls. I do not want to receive telemarketing calls. why should I have to be bothered 24/7 with these obnoxious people calling? Citizens should have the option to disallow this activity.
